

EXPLANATION

— 50,000 —
 Line of equal transmissibility
 Shows approximate transmissibility
 in gallons per day per foot
 Interval, 25,000 gallons per day per foot

Areas of greatest transmissibility are
 generally the most favorable for
 development of fresh ground water

Figure 20
**Areas Most Favorable for Development of
 Fresh Ground Water**
 U.S. Geological Survey in cooperation with the
 Texas Water Development Board and others

Base compiled from topographic maps of the U.S. Geologic Survey
 and county maps of the Texas State Highway Department
